MAINTENANCE AGREEMENT

An agreement is hereby made between Allen County Road & Bridge Department and

_____ for the application of Magnesium Chloride (Dust Top) for a distance of _____ feet. Said material (Dust Top) shall be applied by a private contractor and resident agrees to remit to Allen County the sum of \$ 2.37 per foot (minimum 300 feet). A maintenance agreement **must** be signed and the fee **paid in full prior** to the application of the material. Check shall be made to Allen County Public Works, and delivered to the Director of Public Works office on or before April 11, 2025. Flags for proper marking are available in the Public Works office

Allen County will preserve the "dust inhibitor" for 60 to 90 days after treatment. Residents are reminded that this material is a "dust inhibitor" and designed to "help" control dust, it will not eliminate all dust. Factors such as weather and traffic flow will affect the materials performance. In most cases this material performs well and can be maintained throughout the year by being bladed occasionally. The county's primary responsibility is maintenance of the road bed for the traveling public and when conflicts arise between maintaining the "dust inhibitor" and the traveling public, the traveling public will receive the first priority.

Allen County makes no implied or stated warranty concerning the effectiveness of this material.
